Within "SwapAdditionalTerms"

- added a second sequence in which bondReference is made as a mandatory element and swapStreamReference is an optional element, to avoid sure swapStreamReference appearing without bondReference.
- made the first, original sequence optional, to still allow the additionalTerms container appear an empty. Instead, add an annotation, explaining the empty container.
- updated the annotation: "SwapAdditionalTerms" - "Additional terms to a swap contract." to include explanation for the empty container "If the Swap AdditionalTerms container is empty, there is no additional terms."

The changes were approved at the AWG call
